

Anthony Duenez Ramirez

Soledad, CA | 831-225-9296 | [LinkedIn](#) | [Github](#) | [Portfolio](#)

EDUCATION

California State University of Monterey Bay, Seaside, CA

B.S. Computer Science (expected May 2027)

Stanford University, Stanford, CA

Summer Session (2023)

TECHNICAL SKILLS

Languages: Swift, Python, C++, JavaScript, Java

Databases: Supabase, PostgreSQL, Room (SQLite)

Frameworks/Tools: Node.js, Express, SwiftUI, REST APIs

Developer Tools: Git, Docker, Mocha, Chai, Figma

EXPERIENCE

Open Energy Dashboard - Open Source Contributor

Nov 2025 – Dec 2025

- Built a partial-update **REST API** system preventing unintended data overwrites
- Refactored backend **API logic** to **improve maintainability** across services
- Added **automated tests** for energy conversion validation in **Dockerized Node.js/PostgreSQL** environment
- Implemented **backend test** coverage using **Mocha and Chai**
- ([Pull Request](#) #1) ([Pull Request](#) #2)

Handshake AI Fellowship - AI Trainer

Dec 2025 - Jan 2026

- Evaluated and refined prompts to improve **LLM reasoning, accuracy, and edge-case** handling.
- Analyzed model outputs for **clarity, factual consistency, and response quality**.

PROJECTS

Steps - Screen Time Control (Swift, SwiftUI, HealthKit, FamilyControls)

- Built and shipped an iOS app on the [App Store](#) that restricts selected apps until users reach daily step goals
- Integrated **HealthKit** and **FamilyControls** for real-time tracking and OS-level restrictions
- Designed onboarding, navigation, and daily reset flows using **SwiftUI**

Ethocal - DesignVerse 2026 “Cookie Cutter” Award (Figma, UX Research, Rapid Prototyping)

- Won the **MLH-sponsored “Cookie Cutter” award** for rapidly iterating **high-fidelity mobile prototypes** during a 24-hour design sprint
- Designed a sustainability-focused app enabling users to discover local thrift stores, yard sales, and ethical brands through **map-based exploration**
- Conducted **competitive analysis** and translated **user feedback** into iterative UX improvements from lo-fi to hi-fi prototypes

StrideScribe - Real-time GPS run tracker (Swift, SwiftUI, MapKit, CoreLocation)

- Built a real-time GPS run tracker with **pace, distance, and route visualization**
- Implemented **background-safe location tracking** and interactive live-stat UI
- Designed route overlays and post-run summaries using **MapKit**
